Aberystwyth University Graduate with a First Class in Accounting and Finance and Computing and three Sir Julian Hodge Awards for consistent top performance. I enjoy combining my financial and technical skillset to create tools for finance, automation, and analysis, demonstrated through fraud analysis work experience with Experian and DigData. Seeking a role in Accounting.

Micheldever Tyre Services

Walsall

Warehouse Operative

June 2022 – August 2023 | June 2024 – Feb 2025

- Coordinated approximately 2000-3000 SKUs inbound and outbound under tight time constraints with a team in a strategic, efficient manner.
- Conducted manual stock audits, identifying discrepancies, verifying inventory accuracy, and performing recounts to resolve errors, ensuring customers relations remain positive by minimising errors.
- Implemented process improvements that reduced stock take duration by 50%.

Experian & DigData Virtual Work Experience Project

June 2025

- Performed analysis with Python using Pandas, NumPy, and Matplotlib on a multi-CSV dataset and profiled characteristics of confirmed money mules to predict future potential money mules, preventing financial crimes.

Leadership & Activities

Aberystwyth University

- Volunteered as a Student Rep for Finance, serving as the main point of contact between students and lecturers / module coordinators to facilitate feedback and communication.
- Volunteered as a Peer Guide for new students at Aberystwyth, providing guidance and support with accessing essential university services.

Projects

Gamified Web-Based Portfolio Tracker: A full-stack web application that teaches healthy financial habits through gamified investing. It merges real-time market APIs with quantitative analysis to deliver institutional-grade portfolio analysis and risk metrics.

Stock Shortage System: An API-driven Node.js project that enabled real-time communication among co-workers to be notified of stock shortages which boosted employee satisfaction.

Salary Calculator and Budgeting App: A web project that allows users to input the hourly rate, overtime, pension, and extra pay to calculate monthly take-home pay and then budget based off forecasted income.

Certifications

Kyle Shakespeare

LSEG: Finance Essentials (20/8/2025) – Completed during the summer prior to the final year of university. This course enhanced knowledge of economic policies, capital markets, equities, forex, and fixed income.
